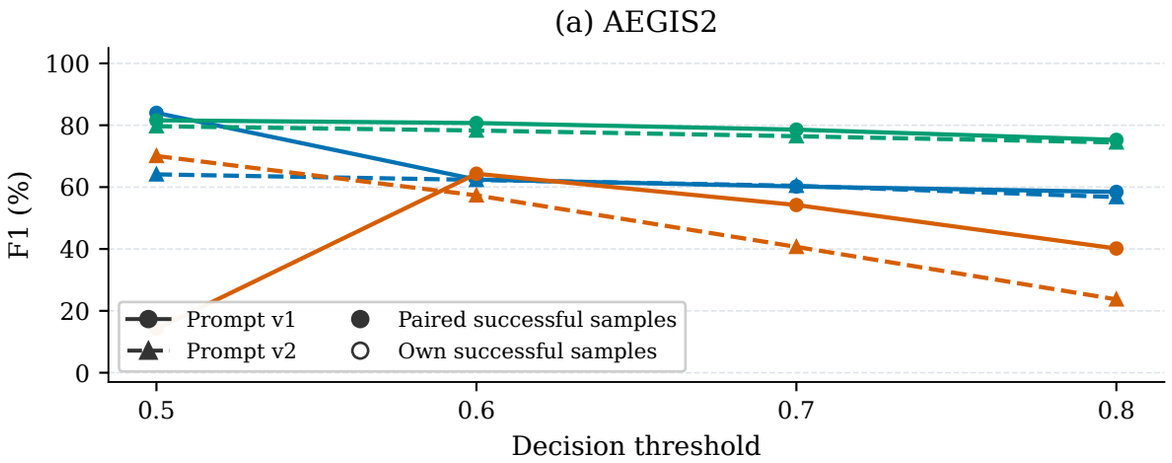
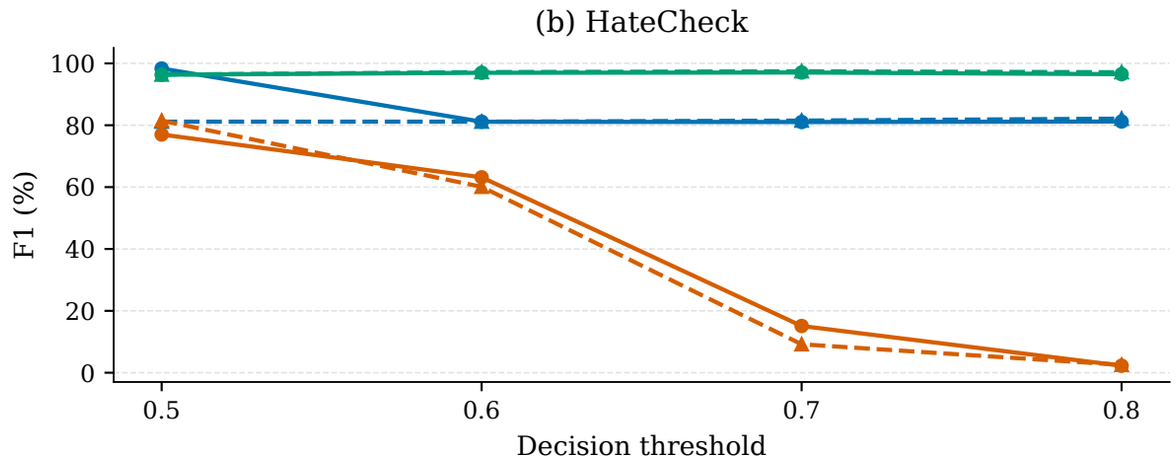
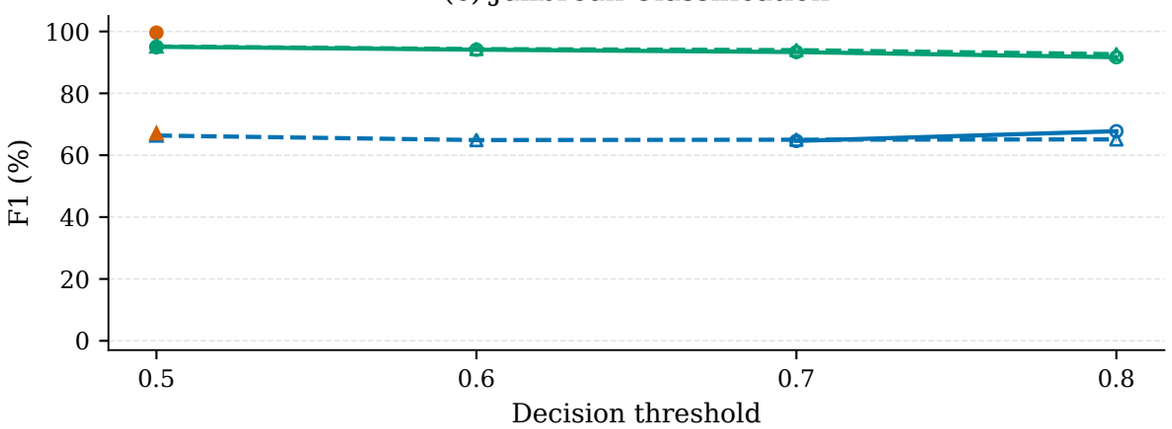
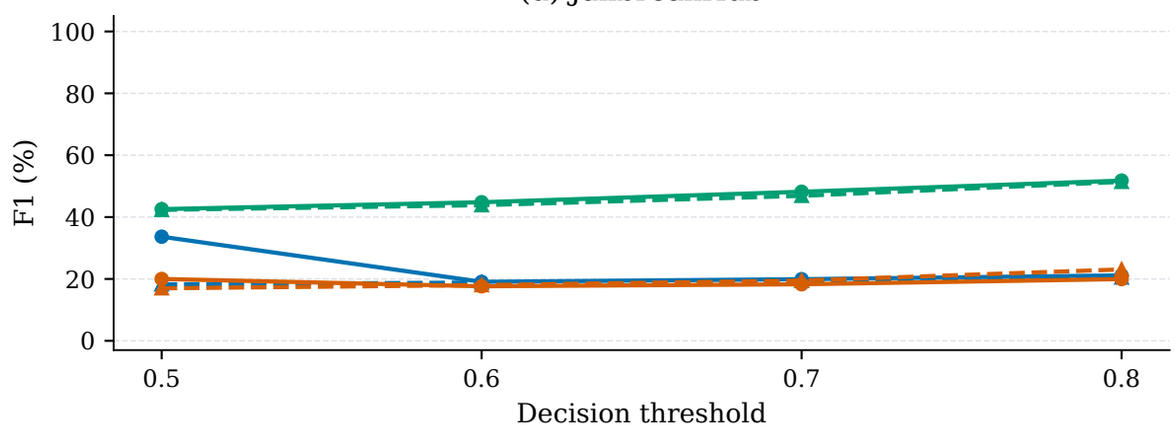
Prompt and Threshold Sensitivity (Fastino, Laya, TypeSafe)

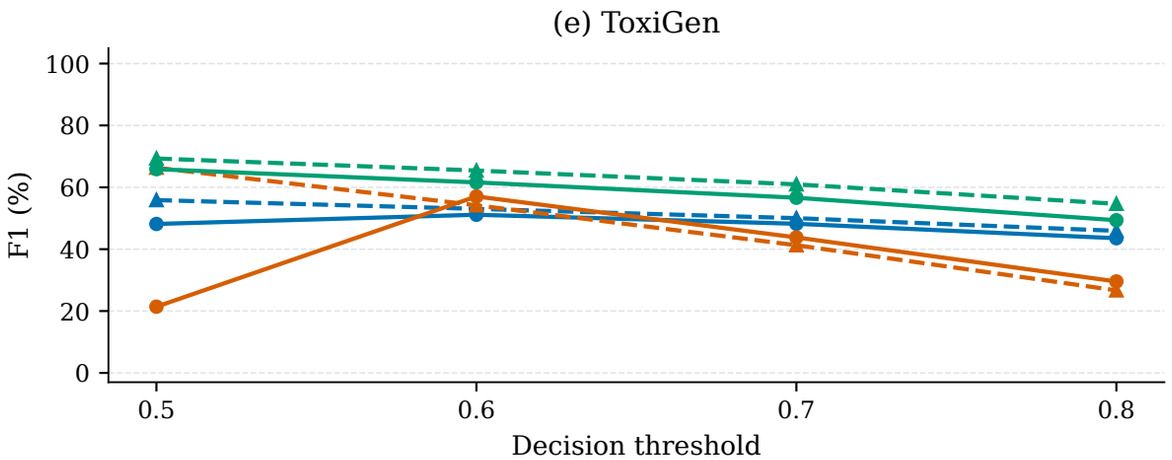
Exploratory test-set sweeps, not held-out model selection











Filled markers: paired successful samples; hollow: own successes when paired metrics are unavailable.
Sample sets can differ across points; this is not a fair ranking. Missing or all-failed runs remain gaps.
Curves mix threshold effects and repeat-call variation.
Scores are not held fixed across thresholds; lines do not imply independent replicates or confidence intervals.

Fastino | request: fastino/GLiDE
resolved: glide_v2

Laya | request: typed-decisions
serving: laya-rl-agent
routed: typed-decisions

TypeSafe | request: jev-latest
resolved: unconfirmed (API response required)
