
ToxiGen / HateCheck / AEGIS2 — v1, threshold 0.5
Corrected Noul vs saved historical Jev; historical prepared rows, not new holdouts.
Equal weight per dataset; quality only. Latency is shown separately.

Paired classification F1 — v1, threshold 0.5
Historical prepared rows; not the new held-out split policy. v1 / threshold 0.5 unless stated. Jev is a saved historical reference, not a rerun.

Positive document detection rate

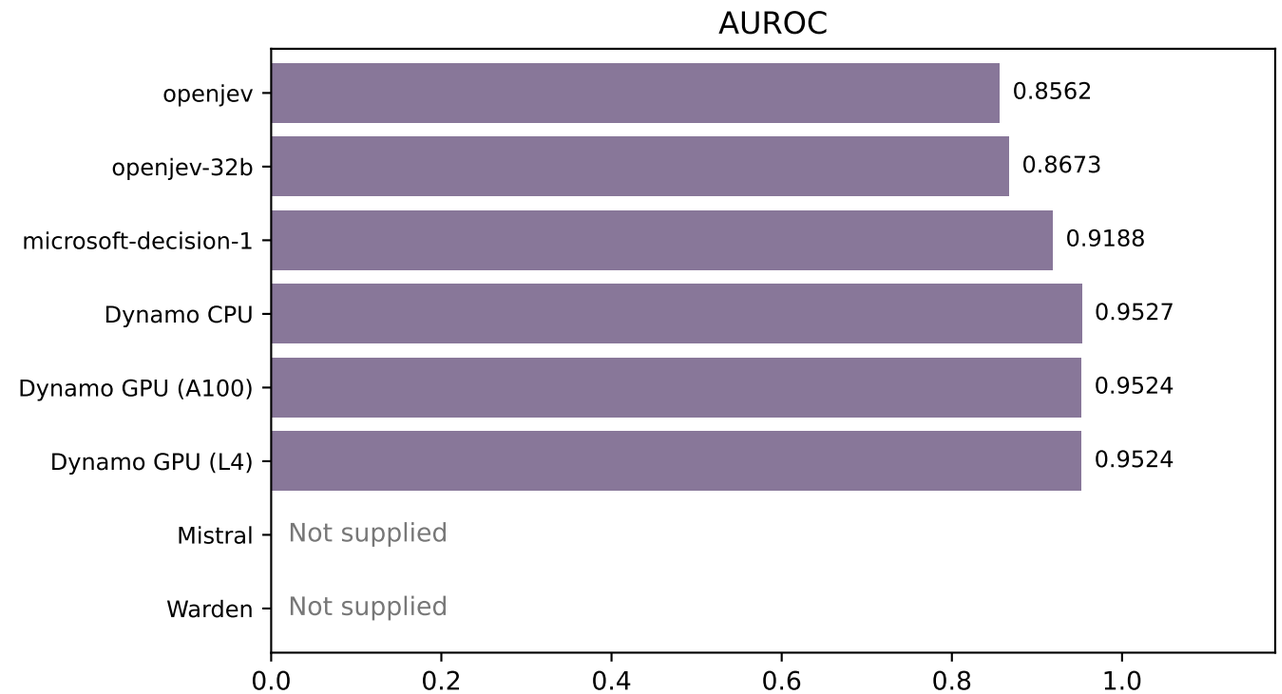

Supplied historical aggregates — unpaired references
Preserved separately from the corrected live comparison; no fresh evaluation claimed.

Reference material only

Dataset scopes and successful rows unverified.
Prompt configuration not uniformly supplied.
No shared-row ranking against corrected runs.
Latency conditions differ; see source CSV.
Missing F1 is not inferred from precision/recall.
